

Vegetation Map of South Africa, Lesotho and Swaziland Descriptions on BGIS

Instructions for viewing pdf's:

1. Go to the BGIS vegetation map page (<http://bgis.sanbi.org/vegmap/project.asp>)
2. A project overview page will appear. On the left-hand side is a “project maps” section. Click on the “National Vegetation Map 2006” link.
3. A map overview page will appear. On the left-hand side is a “view interactive map link”. Click on the link. To view the interactive map you will need to register as a BGIS user, turn off pop-up blocker and install Silverlight viewer.
4. On the interactive map you will find the following toolbar.

5. Click on the “Point Identify” button and then click on any feature in the map. The identify results will be displayed in the information panel.

6. The vegetation type 2006 results displayed will show the vegetation type, vegetation type code, source layer and a link to a PDF.
7. Click on the “Links” link to view the pdf description of the vegetation type.
