

Contents in brief

Executive summary.....	1
1. Introduction.....	23
2. Key highlights.....	31
3. Ecosystem threat status and protection level.....	37
4. Terrestrial ecosystems.....	47
5. River ecosystems.....	61
6. Wetland ecosystems.....	73
7. Estuarine ecosystems.....	83
8. Marine and coastal ecosystems.....	93
9. Resilience of biodiversity to climate change.....	109
10. Species of special concern.....	119
11. Invasive alien species.....	133
12. Spatial biodiversity priority areas and priority actions.....	148
13. Knowledge gaps and research priorities for strengthening the NBA.....	167
Acknowledgements.....	173
Glossary.....	177

Contents

Foreword	iii
List of figures	viii
List of tables.....	xiv
List of panels.....	xiv
List of boxes	xv
Online resources.....	xvi
Executive summary.....	1
1. Introduction	23
1.1 The role of the NBA.....	24
1.2 Headline indicators in the NBA.....	29
1.3 The systematic approach to biodiversity planning and assessment	29
1.4 How to find your way around this report	30
2. Key highlights	31
3. Ecosystem threat status and protection level.....	37
3.1 Introducing the headline indicators	37
3.2 More about ecosystem threat status	39
3.3 More about ecosystem protection level.....	42
4. Terrestrial ecosystems	47
4.1 Terrestrial ecosystem threat status.....	47
4.2 Terrestrial ecosystem protection levels.....	56
5. River ecosystems	61
5.1 River ecosystem threat status	65
5.2 River ecosystem protection levels	68
6. Wetland ecosystems	73
6.1 Wetland ecosystem threat status	77
6.2 Wetland ecosystem protection levels	80
7. Estuarine ecosystems.....	83
7.1 Estuarine ecosystem threat status.....	86
7.2 Estuarine ecosystem protection levels.....	90
8. Marine and coastal ecosystems.....	93
8.1 Marine and coastal ecosystem threat status.....	98
8.2 Marine and coastal ecosystem protection levels.....	103
9. Resilience of biodiversity to climate change.....	109
9.1 Climate change risk at the biome scale	110
9.2 Climate change resilience at the landscape scale	113
9.3 Ecosystem-based adaptation to climate change.....	114

10. Species of special concern	119
10.1 Medicinal plants	120
10.2 Harvested marine species	124
10.3 Threatened species	126
11. Invasive alien species	133
11.1 Why are invasive species a problem?	135
11.2 How many known invasive alien species occur in South Africa?	135
11.3 How are invasive species distributed in South Africa?	140
11.4 Turning the challenge into an opportunity	141
11.5 The return on investment hierarchy	146
12. Spatial biodiversity priority areas and priority actions	148
12.1 Biodiversity priority areas	149
12.1.1 Protected areas	150
12.1.2 Critically endangered and endangered ecosystems	151
12.1.3 Critical Biodiversity Areas and Ecological Support Areas	152
12.1.4 Freshwater Ecosystem Priority Areas	155
12.1.5 High water yield areas	157
12.1.6 Flagship free-flowing rivers	158
12.1.7 Priority estuaries	158
12.1.8 Focus areas for land-based protected area expansion	160
12.1.9 Focus areas for offshore protection	160
12.2 Priority actions	162
12.2.1 Reduce loss and degradation of natural habitat in priority areas	163
12.2.2 Protect critical ecosystems	164
12.2.3 Restore and enhance ecological infrastructure	164
12.2.4 Develop a national coastal biodiversity plan	165
12.3 The critical role of human capital development	166
13. Knowledge gaps and research priorities for strengthening the NBA	167
13.1 Building the foundations: national ecosystem classification system	169
13.2 Measuring and mapping ecological condition	170
13.3 Further research on the links between biodiversity and human wellbeing	171
13.4 What does this mean for biodiversity-related monitoring work?	171
Acknowledgements	173
Glossary	177
