Family: Anacardiaceae  
(mango family)
National tree number: 360
Common names: marula

Tree up to 18 m high, with a round to spreading crown, with erect trunk. Leaves crowded towards branchlet ends; leaflets in 3 to 7 pairs + terminal one, dark green above, paler and blue-green below; margins smooth, but toothed in young leaves. Flowers with male and female on separate trees, deep pink and white. Fruits fleshy, rounded, ripening to yellow after falling to the ground, stone very hard with 2 or 3 seeds.

Family: Fabaceae  
(pod-bearing family)
National tree number: 238
Common names: apple-leaf, northern umupanda, rain tree

Small to medium-sized tree, up to 20m high, with a rounded, sparse crown. Young branchlets hairy. Leaves with leaflets in 1 or 2 (or 3) pairs + very large terminal leaf, shiny above, velvety grey-green below. Flowers small, mauve to purple, pea-like, sweetly fragrant, borne in clusters at tips of branches and appear before or with new leaves. Pods flat, narrow wing on one side, with 1 or 2 kidney-shaped seeds.
